

Northeast Montana Health Services, Inc.

Pricing Transparency

The U.S. Department of Health and Human Services and the Centers for Medicare and Medicaid Services has issued guidelines requiring hospitals to put their standard charges in a machine-readable format on the internet annually beginning on January 1, 2019. The attached links provide individual charges for Trinity Hospital and Poplar Community Hospital. This information may be unclear for the average consumer trying to determine an estimate for their hospital expenses. We encourage patients to call 406-653-6500 and to ask for the Business Office if they have more questions on their bills, or if they want to know an estimate for a service.

Standard charges are only required to be updated online annually, so it is possible that a price will change from what is posted online over the course of a year. Supplies and pharmaceutical charges are the charges most likely to change price during the year, as the price is based on what the hospital is paying for supplies.
